## PERSONAL INFORMATION

Second year BSc (Hons) Computer Science with AI student. Developing Practical understanding of core ML concepts and processing through coursework and assignments. Seeking an AI/ML placement role to expand my machine learning on real datasets.

## EDUCATION

**BSc (Hons) Computer Science AI**

**University Of Huddersfield (November 2024 – present)**

### First Year Modules

Discrete Mathematics for Computing – (A)  
Academic English Skill – (B)  
Software Design & Development – (A)  
Computer Hardware – (C)  
Project Skill – (A)  
Computer Networking – (C)

### Second Year Modules

Introduction to AI  
Relational Database & Web Integration  
Algorithm & Data structure  
Team Project  
Object-Oriented System Development  
Computational Mathematics

## TECHNICAL SKILLS

- Java
- HTML, CSS, Java Script
- Python
- SQL, PHP

## KEY PROJECTS

### Personal Portfolio Website (HTML, CSS, Java Script)

- Designed a responsive website using HTML5, CSS3, and JavaScript.
- Hosted the site using GitHub Pages to showcase university assignments.
- *Skill demonstrated: Web design and version control.*

### ATM Banking Simulation (Python)

- Developed a secure console application with user authentication (PIN logic) and account locking features.

- Implemented a menu system for deposits and withdrawals, including validation to prevent overdrafts

## LEISURE ACTIVITIES

- **Art & Sketching** - My main hobby is creating realistic pencil portraits. I enjoy the creative challenge of capturing fine details and expressions, which helps me relax and maintain focus outside of my academic studies.
- **Travel** – When I can find the time and money I love to explore the world. I have so far visited 3-4 cities in UK, my favorite being London, and I hope to travel further in Scotland.
